Test verdict	Passed	

Comments:

System:

The user was created.

Opens home page in logged mode for username "ProjectFMI"

1.4 Traceability matrix

Test Case ID	Bug Description	Note
All test cases for Registration form	When registration window is opened, sometimes texts "РЕГИСТРАЦИЯ ПРЕЗ FACEBOOK" and "РЕГИСТРАЦИЯ ПРЕЗ ЗАЈЕНАТА.BG" are in the left side, sometimes are in the center. Furthermore, when they are placed in left side, they are created as one element, and when they are placed in center, they are created as other element and this makes it difficult to verify that we are in registration page. This is the reason why we don't verify in our test cases if we are in registration page, or not. We just accept that we are in registration page and even without this verification, our tests pass. But we think randomly labels' positions is not correct for the site.	The bug was found in the page registration.aspx

Test verdict	Passed	

Comments:

Favourite recipe should be removed.

This case sometimes fails,
sometimes passes.

System returns:

Number of favourite recipes should be 0

5.4 Traceability matrix

Test Case ID	Bug Description	Note
TC_FUNCT_22, TC_FUNCT_23	When suggestion for recipe page is opened, sometimes text “ПРЕДЛОЖЕТЕ НИ РЕЦЕПТА” is in the left side, sometimes is in the center. Furthermore, when it is placed in left side, it is created as one element, and when it is placed in center, it is created as other element and this makes it difficult to verify that we are in suggestion for recipe page. This is the reason why we don't verify in our test cases if we are in suggestion for recipe page, or not. We just accept that we are in this page and even without this verification, our tests pass. But we think randomly labels' positions is not correct for the site.	The bug was found in the page recipes.aspx
TC_FUNCT_24	We noticed that sometimes adding favourite recipes doesn't work correctly. We found that because we added 3 favourite recipes, but their number in section “Моите рецепти” was 1, not 3. This case doesn't happen every time. It is a bug which can happen.	The bug was found in section “Моите рецепти”
TC_FUNCT_25	Removing favourite recipe also doesn't work correctly. If there is at least 1 favourite recipe in section “Моите рецепти” and we remove it, the message “Рецептата е премахната успешно от списъка с вашите любими рецепти.” is not shown. Instead of this, it is shown only message “Нямате добавени рецепти.” – this message should be shown if there are 0 favourite recipes. But if we remove recipe, other message should be shown, too. Other bug is a situation when we have 3 recipes and after removing 1 of them, their number is 1, not 2. This case doesn't happen every time. It is a	The bug was found in section “Моите рецепти”

Test Case ID	Bug Description	Note
	bug which can happen.
